Application No.: 10/813,624

## AMENDMENTS TO THE CLAIMS

1. (Currently Amended) An organic electroluminescent device comprising:

an organic compound layer including at least one organic compound film containing an organic compound having a phenylamino group, wherein

said organic compound layer contains copper atoms as impurities in a weight concentration of not higher than 500 ppm as impurities.

an organic compound film containing a carrier transporting material.

- (Original) The organic electroluminescent device according to Claim 1, wherein said weight concentration of copper atoms as impurities in said organic compound layer is not higher than 200 ppm.
  - 3. (Original) The organic electroluminescent device according to Claim 1, wherein said organic compound layer includes:
    an organic compound film containing a luminescent material, and

Claims 4-17. (Cancelled)

- 18. (New) The organic electroluminescent device according to Claim 1, wherein said organic compound having a phenylamino group is produced by Ullmann reaction.
- 19. (New) The organic electroluminescent device according to Claim 1, wherein copper is detected by using an ICP (Inductively Coupled Plasma) method.
